

ALDRINE A. FACISTOL

Full-Stack Developer

Batangas, Philippines • 0909 776 2803 • facistol.aldrine@gmail.com

Portfolio: aldrinefacistol.vercel.app • GitHub: github.com/17adie

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years building and maintaining web systems for government agencies and private companies. I specialize in turning complex, manual processes into secure and maintainable digital platforms using PHP, JavaScript, and MySQL. Recently co-designed and built a full Human Resource Information System with role-based access, multi-level approval workflows, and real-time features for a government office serving ~400 employees. Currently expanding into modern stacks (MERN, and Laravel + Vue + Inertia). Comfortable working remotely and joining projects already in progress.

TECHNICAL SKILLS

Languages: JavaScript, PHP, SQL, HTML5, CSS3

Frameworks & Libraries: Slim 4, React, Next.js, Node.js, Express.js, Bootstrap, Tailwind CSS, jQuery

Currently Learning: Laravel, Vue, [Inertia.js](https://inertiajs.com/), GitHub Actions (CI/CD)

Databases: MySQL, MongoDB

Concepts: REST APIs, Single-Page Applications (SPA), OOP, MVC, Role-Based Access Control (RBAC), Server-Sent Events (SSE), WebRTC, Stored Procedures, Cron Job

Tools: Git, GitHub, Composer, npm, Postman, Navicat, TCPDF, PhpSpreadsheet, PhpWord, Apache Cordova, Hostinger

AI-Assisted Development: ChatGPT, Claude, GitHub Copilot, Codex

PROJECTS

HRIS — Human Resource Information System | Full-Stack Developer (Team of 2)

PHP (Slim 4), MySQL, JavaScript (SPA), REST API

- Co-designed and built a complete HRIS from scratch (2-developer team) for a government office serving ~400 employees, covering employee management, leave, overtime, CTO applications, approval workflows, and employee self-service across 13+ modules.
- Built the application foundation used across all modules — a layered backend (MVC + Services + DTO + Middleware) exposing a REST API, and the JavaScript SPA base template.
- Built the employee self-service side end to end — PDS profile management (personal data, education, work history, eligibilities, attachments) and leave, overtime, and CTO application filing with status tracking.
- Implemented page-level access control by user, CSRF protection, rate limiting, secure session management, and security headers to protect sensitive HR and government (PDS) data.
- Collaborated with my co-developer on the multi-level approval and delegation workflow (automatic routing to the correct approver) and the real-time layer — in-app notifications, one-on-one HR chat (cursor-based polling), and Server-Sent Events (SSE) streaming for live-updating approval dashboards.
- Automated document generation (PDF forms, Excel, and Word exports) and bulk employee import with validation, eliminating hours of manual encoding.

MERN Blog Platform | Personal Project

React, Node.js, Express, MongoDB

Live: mern-blog-client-ljra.onrender.com

- Built a full-stack blogging platform with user authentication and full create/read/update/delete post management on a responsive React frontend.
- Developed a RESTful Node.js/Express API backed by MongoDB and deployed it to a live cloud environment.

WORK EXPERIENCE

Computer Programmer | H&K Business Support Inc. — DOLE Regional Office IV-A

Jan 2026 – Present

Calamba City, Laguna

- Built a full-stack web application for Alien Employment Permit (AEP) processing, replacing legacy JOT paper forms with a digital system featuring automated validation and structured data handling.
- Maintain and improve the system in production — resolving data issues, addressing user concerns, and generating reports.

Computer Programmer / LEO III (ALI) | DOLE Regional Office IV-A

Sep 2025 – Dec 2025

Calamba City, Laguna

- Built the TSI Fabrication Online System from scratch, replacing a fully manual process with an online workflow featuring digital evaluation and auto-generated certificates delivered automatically by email.

Computer Programmer | H&K Business Support Inc. — DOLE Regional Office IV-A

Oct 2023 – Sep 2025

Calamba City, Laguna

- Digitized several previously manual DOLE certification processes — PTO-CEI, CSHP, Rule 1020, AEP (Exclusion/Exemption), and No Pending Case — replacing paper workflows with online applications, a digital evaluation workflow for evaluators, and auto-generated certificates delivered automatically by email.
- Delivered PTO-CEI as the standout system: reduced certificate issuance from a manual, hand-prepared task to a single click, and built a client-facing portal where applicants have their own accounts to submit and track application status in real time.
- Diagnosed and fixed bugs at the root cause to prevent recurring issues, keeping systems reliable in production.
- Generated data reports for management and other departments for review and compliance.

Web Developer | Freelance (Remote)

Mar 2022 – Mar 2023

- Added a Sales and Payments module to the ARMS system, enabling transaction tracking, payment management, and a real-time sales dashboard.
- Built an E-Application system from the ground up — admin portal, document request/approval flow, email notifications, and reporting tools.

IT Developer | Advance Medical Access Philippines, Inc.

Mar 2020 – Jan 2022

Makati City, Metro Manila

- Co-developed the ATaccess teleconsultation hybrid app for Android and iOS, featuring doctor/patient registration, video consultations, scheduling, e-prescriptions, and admin tools.
- Implemented secure real-time video chat (WebRTC) running reliably across platforms via Apache Cordova WebView.
- Developed and maintained MySQL stored procedures supporting the platform's core data operations.

Quality System Supervisor / IT | Alpha Laboratory Calamba Phils., Corp.

May 2015 – Feb 2020

Calamba City, Laguna

- Built the AlphaLab Record Management System (ARMS), replacing manual paperwork and simplifying record tracking for the lab department.
- Iterated on the system over several years based on the team's evolving day-to-day needs.
- Managed office-wide IT support — computers, printers, networks, and software.
- Assisted with quality control on lab reports and supported the team with data management.

Data Specialist | Alpha Laboratory Calamba Phils., Corp.

May 2014 – May 2015

Calamba City, Laguna

- Handled data entry, document scanning, customer inquiries, and reporting support while maintaining data confidentiality.

EDUCATION

Bachelor of Science in Information Technology | City College of Calamba

2010 – 2014

Calamba City, Laguna
